In this issue

• Articles

- Insulated sandwich panels
- Off-site manufacturing
- New precast standard
- Prefab construction

• Case Studies

- ANZAC Memorial Walk
- Perth City Link
- Fiona Stanley Hospital
- Wheatstone Trench Culverts
- Collaroy Beach Stormwater Outlet

• Videos

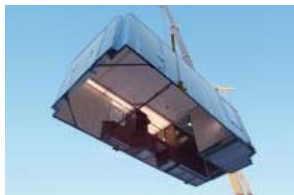

- Flooring series: Adina Apartments
- Flooring series: Bunnings Warehouse
- Flooring series: Brisbane State School
- Sustainable Australia

Articles

Want to better understand insulated sandwich panels?

Learn more in our handbook covering design, manufacture and application. [Read more](#)

Does off-site manufacturing improve construction efficiencies?

The use of off-site manufactured products in construction could probably have the single biggest impact on construction efficiency improvement. [Read more](#)

New standard to reflect increased use of precast

Any minute now the revised AS3850 Prefabricated Concrete Elements, will be published. Previously known as AS 3850-2003 Tilt-up concrete construction, the revised standard expands the standard's scope and brings it into line with current industry practices. [Read more](#)

A prefab 57 story skyscraper built in 3 weeks

Thanks to prefab construction, a Chinese construction company has built the world's tallest prefab tower in under three weeks of work time. [Read more](#)

Precast Projects

ANZAC Memorial Walk - a spectacular and moving project

With difficult site constraints and a tight deadline, Waeger constructions relied on precast concrete to get the job done. [Read more](#)

Perth City Link Project - 100 years in the making

See why the use of precast led to the Perth City Rail Alliance receiving Concrete Institute of Australia National Award for Excellence in the projects Engineering Category. [Read more](#)

Fiona Stanley Hospital - WA's largest ever building infrastructure development

Precast was extensively used throughout the project, for both structural and aesthetic benefits, as well as providing an innovative storm water solution. [Read more about the structure](#) or [Read more about the storm water system](#)

Wheatstone Trench Culverts - engineering for efficiency

This project uses precast concrete instead of the original plan of insitu.

[Read more](#)

Collaroy Beach Stormwater Outlet - reducing flooding

Precast was the clear choice for a project that needed to have the ability to withstand the harsh beach environment. [Read more](#)

Videos

Flooring series video: Adina Apartments, NSW
